CSE222_HW09_Part_1 ERCAN UCA 091044011

✓ Matrix ve list graphları için;

- > Abtract classta tanımladığım loadfull graph ile .xml dosyalarını yükledim
- > Her satırı okumak için loadfile ile satırların içindeki değerlere ulaşıp,
- > insert methodu ile edgeleri ekledim.
- Oluşturulan graphları DijkstraAlgorithm ve prim's algoritmalari kullanarak.
- > sonuçları main de test ettim.
- Bazı hatalar söz konusu oldu bazı .xml dosylarıdaki değerlerin farklılığından o yüzden az test edilmiş oabilir.
- > Son olarak list ve matrix için toplam geçen süreleri ekranda gösterdim.

✓ Matrix Graph Classımda

- → Veri tipi double[][];
- → Abtract class extend ediliyor.

```
private double[][] edges;
* Constructor with 2 parameters
* @param numV point of matrix
* @param directed directed control
*/
public MatrixGraph(int numV, boolean directed) {
  super(numV, directed);
* This method insert new edge
* @param edge this edge will add
*/
@Override
public void insert(Edge edge)
* This method control edge is an edge, controlling with source and
* destination
* @param source source of edge
* @param dest destination of edge
* @return True if is an edge, otherwise false.
*/
@Override
public boolean isEdge(int source, int dest)
* This method return an edge when know edge info.
* @param source source of edge
* @param dest destination of edge
* @return an edge
```

```
@Override
public Edge getEdge(int source, int dest)
/**
* This method return Edge Iterator
* @param source source of edge
* @return Iterator class
*/
@Override
public Iterator<Edge> edgeIterator(int source)
* This method return info about this class
* @return string informations.
*/
@Override
public String toString()
* This inner Class for Edge iterator
private class IteratorEdge implements Iterator {
  • • •
   * Constructor 1 parameter
   * @param source source of edge
  public IteratorEdge(int source)
  /**
   * This Method has next element controlling.
   * @return true if has next element, otherwise false.
   */
  @Override
  public boolean hasNext()
   * This method return next edge
   * @return Next edge
  @Override
  public Edge next()
   * This method remove an edge exception NoSuchElementException
   */
  @Override
  public void remove()
```

- ✓ List Graph Class;
 - **❖** Veri tip edge listesi

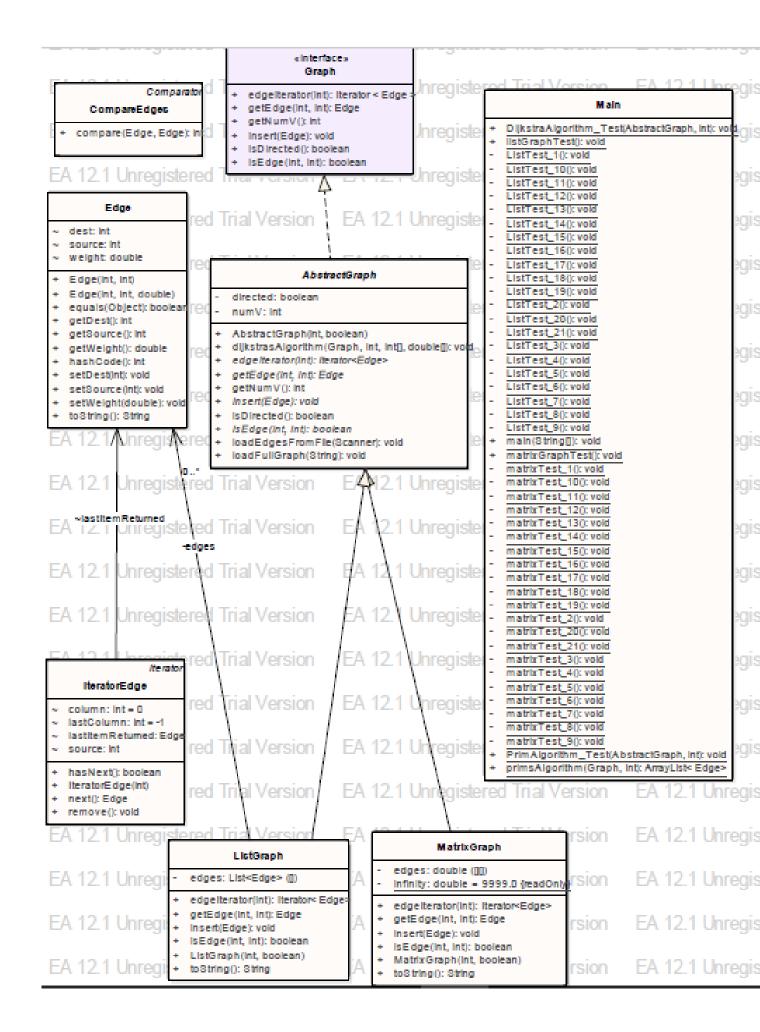

❖ List<Edge>[]

```
* This Class extends Abstract class and
* Data Filed is List edges.
* @author ercan
public class ListGraph
    extends AbstractGraph {
  /**
  * Construct a graph with the specified number of vertices and
  * directionality.
  * @param numV The number of vertices
  * @param directed The directionality flag
  public ListGraph(int numV, boolean directed) {
    super(numV, directed);
  /**
  * Determine whether an edge exists.
  * @param source The source vertex
  * @param dest The destination vertex
  * @return true if there is an edge from source to dest
  @Override
  public boolean isEdge(int source, int dest)
  * Insert a new edge into the graph.
  * @param edge The new edge
  @Override
  public void insert(Edge edge)
  * This method iterator of list Graph
  * @param source source of edge
  * @return iterator by using source
  @Override
  public Iterator< Edge> edgeIterator(int source)
  * Get the edge between two vertices. If an edge does not exist, an Edge
  * with a weight of Double.POSITIVE_INFINITY is returned.
  * @param source The source
  * @param dest The destination
  * @return the edge between these two vertices
  */
```

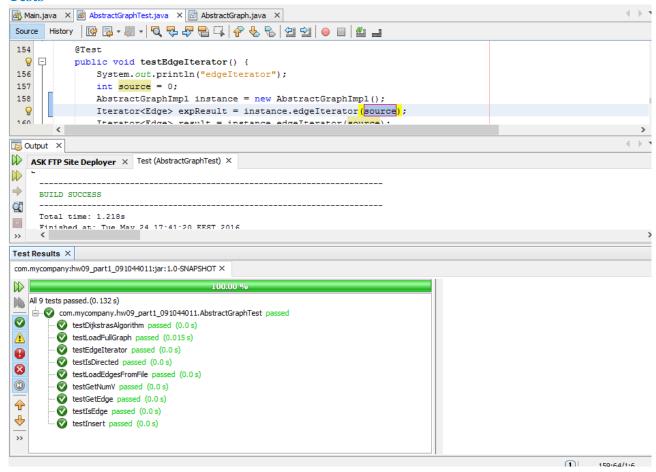

```
@Override
public Edge getEdge(int source, int dest)

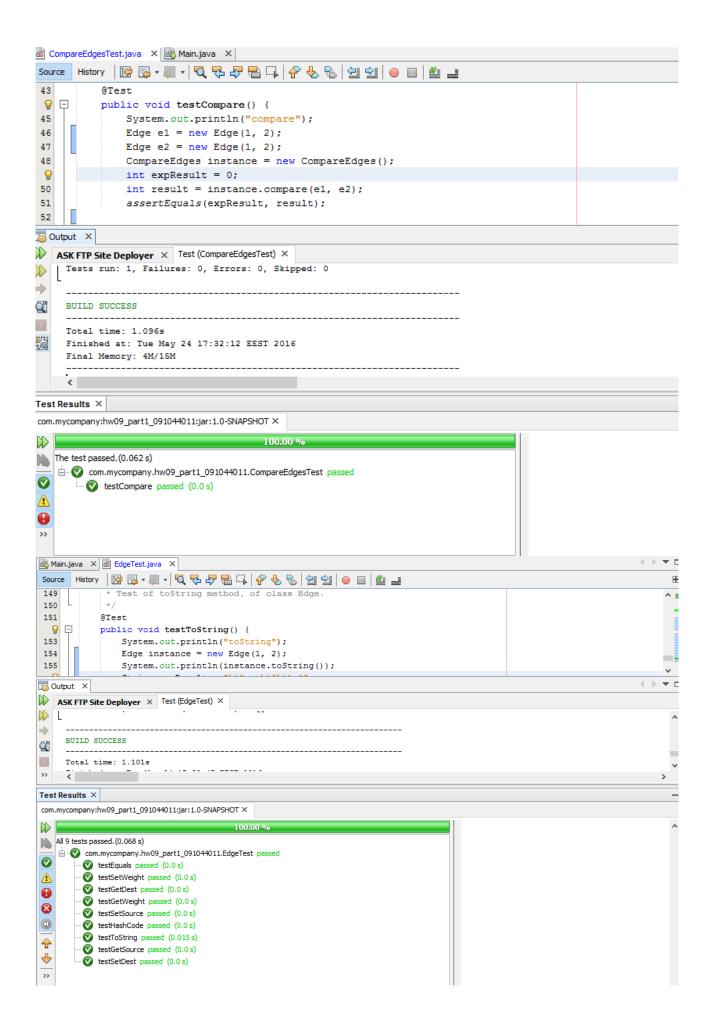

/**
    * This method return info about this class
    * @return string informations.
    */
    @Override
    public String toString()
}
```
